# typotown
büro destruct typographic town generator

Introduction
Typotown is a small Application that makes it possible to build Cities out of Fonts. The Idea originally comes from trips into cities. On such trips you can find many beautiful fonts written on walls and signs of the buildings. Now this application - as it makes Buildings out of Fonts - brings the Fontshape back into the City! Typotown is available as Screensaver or Standalone.

Requirements
To run Typotown (Application or Screensaver) smoothly you need a veeery fast Computer (Mac/PC) with a 3D Graphics Card installed. Otherwise you might be disapointed.

Interface
With the Typotown Interface you are able to perform simple actions. Those are the following (from left to right):Top View / Middle View / Bottom View / Cusom Text (max.4 Characters - press Return) / Change Font / Show Logo / Tranparency (change value) / Outline (on and off) / Tracer (on and off) / Lightbeams (Toggle mode) / Color.

Shortcuts
Using Keyboard shortcuts you can even do more than with the Interface.

Alt-1	Top View	Alt-q	Outline	Alt-f	Move Away	Alt-a	Automatic
Alt-2	Middle View	Alt-w	Tracer	Alt-c	Move Close	Alt-l	Next Font
Alt-3	Bottom View	Alt-e	Lightbeams	Alt-g	Move Up	Alt-n	Color
Alt-4	Transparency	Alt-r	Backlight	Alt-v	Move Down	Alt-Shift-x	Xpert
Alt-5	Lightbeams	Alt-t	Fog	Alt-h	Look Down	Cursor	Navigate
Alt-6	Color	Alt-o	Orthagonal	Alt-b	Look Up	Mouse	Navigate
